Election/Restrictions

The applicant's election of Species I. (figures 1-6) filed on Oct. 29, 2004 without traverse is acknowledged. However, the applicant added new claims 66-68 which are directed to another invention. The applicant is therefore required to elect one of the inventions listed below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 41-47 and 56-65, drawn to a framed display, classified in class 40, subclass 738.
- II. Claims 66-68, drawn to a method of creating a self trimmed composite picture, classified in class 29, subclass 428.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process such as taking first and second pictures, getting the pictures developed, cutting out portions of the second picture and adhering them to the first picture in order to create a composite picture.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3611

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The applicant is reminded that in each section of an amendment document must be on a separate sheet. See 37 CFR 1.121. In the amendment filed on 10/29/2004, the applicant included after claim 68 a remarks section (All above outstanding Claims, etc.) which should have appeared on a separate page.
